

PVC WATERSTOPS

Accessories for PVC membranes

Pipe fittings					
Pipe fitting for membrane waterproofing used for resin injections.					
			<p>Pipe fitting</p> <p>The pipe fittings are used to seal the membranes when making infection pipes. The injection pipe fitting has a smooth flange to weld them to the PVC or PE membranes and a central shank consisting of three stages. The pipe fittings are welded on the membranes with a special hot air blower, heating gun.</p>
